PROFILE

Full Stack Developer and Electronics Technician with experience in real-world projects across various industries. I combine a strong foundation in electronics with software development skills to create efficient and scalable solutions. I have developed APIs using NestJS, TypeScript, and PostgreSQL (authentication, access control, and file handling) and built modern interfaces with React and Next.js, prioritizing usability, performance, and clean code. I am passionate about scalable architectures, continuous improvement, and teamwork.

LANGUAGES AND TECHNOLOGIES:

Programming Languages: JavaScript, TypeScript, HTML/CSS, C#.

Technologies: NestJS, Express, Node.js, TypeORM, JWT, Mapbox, MercadoPago, Cloudinary, Vercel, Render, Swagger, Next.js, React, TailwindCSS.

Database: PostgreSQL (Supabase, pgAdmin), MongoDB.

Tools: Git, GitHub, Trello, Slack.

Agile: Scrum.
