PROFILE

Full Stack Developer and Electronics Technician with experience in real-world projects across various industries. I combine a strong foundation in electronics with software development skills to create efficient and scalable solutions. I have developed APIs using NestJS, TypeScript, and PostgreSQL (authentication, access control, and file handling) and built modern interfaces with React and Next.js, prioritizing usability, performance, and clean code. I am passionate about scalable architectures, continuous improvement, and teamwork.

LANGUAGES AND TECHNOLOGIES:

Programming Languages: JavaScript, TypeScript, HTML/CSS, C#.

Technologies: NestJS, Express, Node.js, TypeORM, JWT, Mapbox, MercadoPago, Cloudinary, Vercel, Render Swagger, Next.js, React, TailwindCSS.

Database: PostgreSQL (Supabase, pgAdmin), MongoDB.

Tools: Git, GitHub, Trello, Slack.

Agile: Scrum.

EXPERIENCE:

Full Stack Developer | Referbby — Professional Internship

September 2025 – Present

- **Project:** Assistance platform for people with disabilities or reduced mobility (e.g., single mothers).
 - **Description:** Full stack development of a web application for ROOTS Cooperative, including an informational landing page, product marketplace, and visit booking system. Implemented frontend features using Next.js, React, and TypeScript, including state management, validations, and REST API integration. Developed backend services with Node.js/NestJS, including business logic, availability management, and Swagger documentation. Integrated authentication, third-party services, and CI/CD deployments in production environments.
 - **Stack:** NestJS, TypeScript, JWT, bcrypt, MercadoPago, Cloudinary, Nodemailer, Stripe, React, Vercel, Render.
-

Full Stack Developer | Adbize — Professional Internship

September 2025 – Present

- **Project:** Academic portal for a university in Mexico.
 - **Description:** Development of a web portal with functionalities for students and teachers, including course registration, grade visualization, user management, secure access, and role-based permissions.
 - **Stack:** JavaScript (ES6+), Node.js, Express, Socket.io, React, Supabase, OpenAI, Styled Components, Bootstrap, Axios, PostgreSQL, Vercel, Render.
-

Full Stack Developer | Freelance — Roots Cooperative & Henry

July 2025 – August 2025

- **Project:** Henry final project and freelance work.
 - **Description:** End-to-end development (frontend and backend) of an application connecting people with reduced mobility, disabilities, or family care responsibilities with flexible services and income opportunities.
 - **Stack:** TypeScript, Node.js, NestJS, Swagger, Mapbox, MercadoPago, Cloudinary, Vercel, Render, GitHub, Supabase, Next.js, Figma, React, Auth0, Google Console.
-

Full Stack Developer | Distrito Moda

April 2024 – April 2025

- **Project:** Wholesale e-commerce platform focused on logistics integration and partner store management.
- **Description:** Full development and technical support of an online platform connecting clothing manufacturers and stores with wholesale buyers nationwide. Contributed to continuous improvement, process optimization, and feature expansion.
- **Technologies:** Drupal, PHP, JavaScript, jQuery, MySQL, Mercado Pago API, OCA API, Correo Argentino API

Key Responsibilities:

- Integration of payment and logistics service APIs (Mercado Pago, Correo Argentino, OCA, among others).
 - Development of custom modules for product, order, and user management.
 - Ongoing maintenance and evolution of the wholesale e-commerce platform.
-

Full Stack Developer | Freelance

January 2023 – January 2023

- **Project:** Portfolio website for a Community Manager.
- **Description:** Website focused on helping brands grow on social media, showcasing previous work, digital communication services, and a contact section designed to convert visitors into clients.
- **Stack:** Vite, TypeScript, React, shadcn-ui, Tailwind CSS.

EDUCATION

- Full Stack Web Developer. Henry Bootcamp (March 2025 – August 2025).
- Electronics Technician E.E.S.T N°1 Merlo (February 2014 – March 2021).

ADDITIONAL EDUCATION

- Programming Track — CFP N°24 (March 2024 – December 2024) Modules: Programming techniques, databases, object-oriented programming (C#), labor relations, and professional orientation.
